SAMPLE REPORT

Liferay DXP Architecture Health Check

Liferay Upgrade Program - Assessment phase, step 3

Customer	Example Corp (fictitious)
Environment assessed	UAT, copy of production from 2026-10-15
Current release	Liferay DXP 7.3 (Update 35)
Recommended target	Liferay DXP 2026.Q1 LTS
Input	Output of the read-only assessment script dxp_7_3-all.groovy
Report date	2026-11-03

Disclaimer. This is a fictitious example. The company, people, data and findings are invented for illustration. The Liferay DXP architecture health check is provided on a best-effort basis and for reference only. It is based on the output of the read-only assessment script and is not an audit, a guarantee or a warranty. Results and recommendations depend on your environment and may change after further review.

SAMPLE FICTITIOUS DATA

1. Executive summary

Example Corp runs Liferay DXP 7.3, which left Premium Support on 2024-10-12 and is in Limited Support until 2027-10-12. The platform is stable and well within sizing limits, but the application server, JDK, search engine and part of the custom code must change for an upgrade to 2026.Q1 LTS. None of the findings blocks the upgrade.

Area	Rating	Summary
Support lifecycle	Amber	Limited Support: no new fixes. Plan the upgrade before 2027-10-12.
Infrastructure	Red	Tomcat 9, JDK 11 and Elasticsearch 7.17 are not certified for 2026.Q1 LTS.
Database	Amber	MySQL 5.7 is deprecated; move to MySQL 8.0 or 8.4 with the upgrade.
Data volumes	Green	14,200 users, 38,500 web content articles, 212 GB documents: standard upgrade.
Customizations	Amber	47 custom modules, 14 use Java EE (javax.*) and need Jakarta EE.
Deprecated features	Amber	6 deprecated features in use, 2 with no direct replacement.

Overall: ready for the upgrade program, with infrastructure changes and a code migration (Java EE to Jakarta EE) as the main work items.

2. Support lifecycle

Release	First ship date	End of Premium Support	End of life	Status today
Liferay DXP 7.3	2020-10-13	2024-10-12	2027-10-12	Limited Support
Liferay DXP 2026.Q1 LTS (target)	2026-03-18	2029-03-17	2031-03-17	Premium Support

3. Compatibility with the target release (2026.Q1 LTS)

Component	Current	Status for 2026.Q1 LTS	Recommended action
JDK	OpenJDK 11.0.22	Red	Move to JDK 21 (JDK 17 is deprecated).
Application server	Apache Tomcat 9.0.85	Red	Move to Tomcat 10.1 (Jakarta EE 10).
Database	MySQL 5.7.44	Amber	Deprecated; upgrade to MySQL 8.0 or 8.4.
Operating system	Red Hat Enterprise Linux 7.9	Amber	Deprecated; plan RHEL 8, 9 or 10.
Search engine	Elasticsearch 7.17.18 (remote)	Red	Elasticsearch 7 reached end of life; upgrade to 8.19.
Rich text editor	CKEditor 4 (default)	Amber	Deprecated from 2026.Q3; review custom CKEditor plugins.
Hosting	Self-hosted - cloud virtual machine (AWS)	Green	Supported (EC2 and RDS are certified).

SAMPLE FICTITIOUS DATA

4. Data volumes and sizing

Item	Count / size	Comment
Virtual instances / sites	2 / 64	
Users / organizations	14,200 / 310	
Web content articles (all versions)	38,500 (121,000)	Consider cleaning up old versions before the upgrade.
Documents and Media	96,400 files, 212 GB	File system store; copy it for the upgrade rehearsal.
Database size	41 GB, largest table 9.8 GB	Within normal range.
Languages	3 (en_US, de_DE, ja_JP)	

5. Customizations

Type	Count	Upgrade impact
Custom OSGi modules	47	14 import Java EE (javax.*) packages: migrate to Jakarta EE.
Themes	2	1 theme uses Soy templates (removed): rebuild the templates.
Custom fragments / page templates	58 / 12	Review after the upgrade; usually low effort.
Hooks / EXT plugins	3 / 1	The EXT plugin must be replaced by modules or client extensions.
Workflow definitions with scripts	4	Retest; scripts run only if Script Management allows it.
Client extensions	0	Consider client extensions for new customizations.

6. Deprecated features in use

Feature	Usage	Status	Replacement
Message Boards widget	9 pages	Deprecated	Questions / custom solution
Wiki	2 sites, 1,140 pages	Deprecated	Knowledge Base or web content
Dynamic Data Lists	6 lists	Deprecated	Objects
Kaleo Forms	2 processes	Deprecated	Objects with workflow
Velocity templates	11	Removed	FreeMarker
Akismet	Configured	Deprecated	No direct replacement

7. Recommendations and next steps

1. Upgrade the infrastructure with the Liferay upgrade: JDK 21, Tomcat 10.1, Elasticsearch 8.19, MySQL 8.4.
2. Migrate the 14 custom modules from Java EE to Jakarta EE and replace the EXT plugin.
3. Decide on replacements for Wiki, Message Boards, Dynamic Data Lists and Kaleo Forms before the upgrade.
4. Clean up old web content versions to shorten the database upgrade.

Your choice. This health check is free and you can stop here, with no obligation. If you want to continue, Liferay validates whether you qualify for the Liferay upgrade program (step 4) and, if you do, shares the contractual terms for sign-off.
